

How well does the health care system in Minnesota work for people of different racial and ethnic groups?

In Minnesota, **White people** experienced the **best health care outcomes, access, and quality**, scoring in the 91st percentile among all population groups nationally.

AIAN people experienced the **worst health care outcomes, access, and quality** in the state, scoring in the 13th percentile.

Compared to other states in the Plains region, Minnesota has **less severe** racial and ethnic health disparities.

Health System Performance by Race/Ethnicity

Each column is a racial/ethnic group, and each point represents a state. Performance represented as percentiles (1–100). Minnesota performance percentile highlighted. No highlighted dot indicates overall performance data not available for that group.

Population by race/ethnicity (2024)

	Minnesota		Plains		United States	
Total	5,732,095		21,646,244		335,268,606	
AANHPI	306,570	5%	724,921	3%	21,483,845	6%
AIAN	40,226	<1%	182,283	<1%	1,720,874	<1%
Black	430,471	8%	1,453,425	7%	38,820,084	12%
Hispanic	385,330	7%	1,741,470	8%	67,230,087	20%
White	4,282,642	75%	16,470,411	76%	188,863,832	56%

Notes: AANHPI = Asian American, Native Hawaiian, and Pacific Islander. AIAN = American Indian and Alaska Native. “—” means data not available. Plains states include IA, KS, MN, MO, NE, ND, SD.

How well does the health system in Minnesota work for people from different racial and ethnic groups and across different dimensions of care?

AANHPI

Minnesota ranks 20th among the 33 states we were able to rank. This indicates that the state's health system performance for AANHPI people was worse than the average compared to other states.

- Health outcomes ranking: **30** (of 36) is worse than the average
- Health care access ranking: **20** (of 36) is worse than the average
- Health care quality ranking: **30** (of 45) is worse than the average

AIAN

Minnesota ranks 12th among the 21 states we were able to rank. This indicates that the state's health system performance for AIAN people was worse than the average compared to other states.

- Health outcomes ranking: **20** (of 23) is among the worst
- Health care access ranking: **5** (of 21) is among the best
- Health care quality ranking: **1** (of 25) is among the best

Black

Minnesota ranks 33rd among the 39 states we were able to rank. This indicates that the state's health system performance for Black people was worse than the average compared to other states.

- Health outcomes ranking: **9** (of 41) is better than the average
- Health care access ranking: **20** (of 41) is better than the average
- Health care quality ranking: **45** (of 45) is among the worst

Hispanic

Minnesota ranks 36th among the 49 states we were able to rank. This indicates that health system performance for Hispanic people was worse than the average compared to other states.

- Health outcomes ranking: **3** (of 50) is among the best
- Health care access ranking: **35** (of 50) is worse than the average
- Health care quality ranking: **44** (of 50) is worse than the average

White

Minnesota ranks 11th among the 51 states we were able to rank. This indicates that the health system performance for white people was better than the average compared to other states.

- Health outcomes ranking: **7** (of 51) is better than the average
- Health care access ranking: **15** (of 51) is better than the average
- Health care quality ranking: **14** (of 51) is better than the average

Notes: Lower values indicate higher rank and better performance among each racial/ethnic group in Minnesota compared to other states. Performance data not available for all groups in every state.
