

# How well does the health care system in Nevada

work for people of different racial and ethnic groups?

In Nevada, **AANHPI people** experienced the **best health care outcomes, access, and quality**, scoring in the 66th percentile among all population groups nationally.

**Hispanic people** experienced the **worst health care outcomes, access, and quality** in the state, scoring in the 15th percentile.

Compared to other states in the West region, Nevada has **less severe** racial and ethnic health disparities.

## Health System Performance by Race/Ethnicity

Each column is a racial/ethnic group, and each point represents a state. Performance represented as percentiles (1–100). Nevada performance percentile highlighted. No highlighted dot indicates overall performance data not available for that group.

## Population by race/ethnicity (2024)

	Nevada		West		United States	
Total	3,229,291		56,390,390		335,268,606	
AANHPI	325,410	10%	8,485,098	15%	21,483,845	6%
AIAN	16,062	<1%	302,236	<1%	1,720,874	<1%
Black	289,778	9%	2,636,472	5%	38,820,084	12%
Hispanic	990,891	31%	18,932,453	34%	67,230,087	20%
White	1,381,531	43%	22,534,209	40%	188,863,832	56%

Notes: AANHPI = Asian American, Native Hawaiian, and Pacific Islander. AIAN = American Indian and Alaska Native. “—” means data not available. West states include AK, CA, HI, NV, OR, WA.

# How well does the health system in Nevada work for people from different racial and ethnic groups and across different dimensions of care?

## AANHPI

Nevada ranks 27th among the 33 states we were able to rank. This indicates that the state's health system performance for AANHPI people was worse than the average compared to other states.

- Health outcomes ranking: **34** (of 36) is among the worst
- Health care access ranking: **28** (of 36) is worse than the average
- Health care quality ranking: **23** (of 45) is worse than the average

## AIAN

An overall ranking for AIAN people in Nevada is not available because of insufficient data.

- Health outcomes ranking: **5** (of 23) is among the best
- Health care access ranking: insufficient data
- Health care quality ranking: **20** (of 25) is among the worst

## Black

Nevada ranks 19th among the 39 states we were able to rank. This indicates that the state's health system performance for Black people was better than the average compared to other states.

- Health outcomes ranking: **21** (of 41) is worse than the average
- Health care access ranking: **19** (of 41) is better than the average
- Health care quality ranking: **27** (of 45) is worse than the average

## Hispanic

Nevada ranks 35th among the 49 states we were able to rank. This indicates that health system performance for Hispanic people was worse than the average compared to other states.

- Health outcomes ranking: **31** (of 50) is worse than the average
- Health care access ranking: **34** (of 50) is worse than the average
- Health care quality ranking: **34** (of 50) is worse than the average

## White

Nevada ranks 40th among the 51 states we were able to rank. This indicates that the health system performance for white people was worse than the average compared to other states.

- Health outcomes ranking: **39** (of 51) is worse than the average
- Health care access ranking: **44** (of 51) is worse than the average
- Health care quality ranking: **42** (of 51) is worse than the average

Notes: Lower values indicate higher rank and better performance among each racial/ethnic group in Nevada compared to other states. Performance data not available for all groups in every state.
