

# MEDICAID:

## What It Brings to Kansas

### Improved Access to Health Care

Medicaid provided health care coverage to 421,638 adults and children in Kansas, an increase of 43,478 since 2013.

Medicaid and Children's Health Insurance Program (CHIP) Enrollment

Medicaid enables people to get needed health care, just like private insurance.

Losing Medicaid would make it hard for people to get health care, and increase their risk of medical debt if they were to get sick.

Commonwealth  
Fund

### Federal Dollars and Jobs

The federal government provided \$2 billion or 56% of the funding for people covered by Medicaid in Kansas.

*Reduced Medicaid funding would mean that hospitals would have to absorb a lot of the cost of care for uninsured people.*

### Opioid Treatment

Cuts to Medicaid would jeopardize access to the drug naloxone, a life-saving medication that can reverse the effect of opioid overdose.

### Lives at risk

An estimated 21 lives were saved in Kansas from opioid overdose due to Medicaid-covered naloxone in 2016.
