

MEDICAID:

What It Brings to New Mexico

Improved Access to Health Care

Medicaid provided health care coverage to 766,732 adults and children in New Mexico, an increase of 309,054 since 2013.

Medicaid and Children's Health Insurance Program (CHIP) Enrollment

Medicaid enables people to get needed health care, just like private insurance.

Continuously insured adults with Medicaid report they have

Losing Medicaid would make it hard for people to get health care, and increase their risk of medical debt if they were to get sick.

Fund

Federal Dollars and Jobs

The federal government provided \$4 billion or 79% of the funding for people covered by Medicaid in New Mexico.

Reduced Medicaid funding would mean that hospitals would have to absorb a lot of the cost of care for uninsured people.

Opioid Treatment

Cuts to Medicaid would jeopardize access to the drug naloxone, a life-saving medication that can reverse the effect of opioid overdose.

470 lives at risk

An estimated 470 lives were saved in New Mexico from opioid overdose due to Medicaid-covered naloxone in 2016.
